3	23-06-2025	Test Sandbox MessageRoutingID updated, formatting adjusted	Thomas Raney
4	28-10-2025	Production LI info added	Thomas Raney

3 Environments and LI Info

Legend:

Sandbox

- No access restriction to the site (example: an applicant can log in as an IM)
- Only the reference data (e.g., loco types) from the Production site is imported (this import occurs during the year and is not continuous synchronisation)

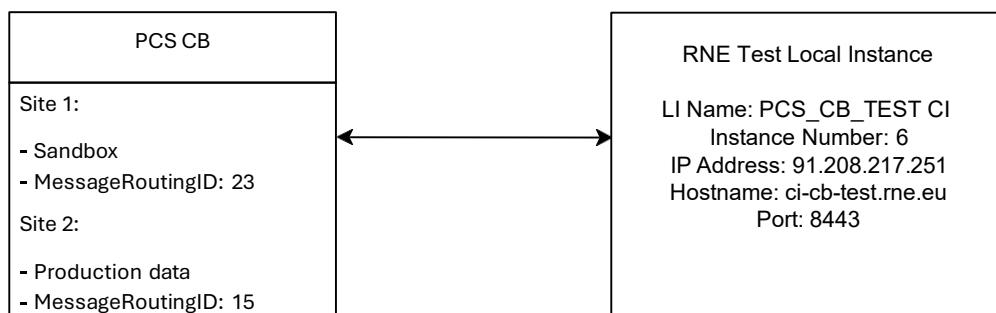

Production data

- Access restriction to this site as in the Production site (example: an applicant cannot log in as an IM)
- All the production data is imported from the Production site (this import occurs during the year and is not continuous synchronisation)

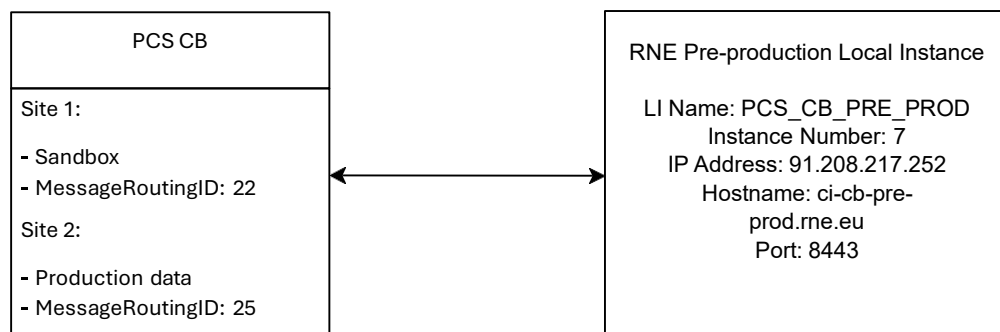

MessageRoutingID

- Makes possible the routing of the message to the correct site in the environment. This element must be included in all messages sent to PCS CB, currently, it will not be included in outbound messages sent from PCS.
